I love the Wal-Mart store, even though I believe they have pit many small stores out of business. I love their prices, as a shopper I love deals and this is the store for them, but on the other hand the Mom & Pop stores are being put out, and this was the foundation of our country. Now they want banking, with loop holes that not every bank can get, and what about the small banks around. Will they be put out of business because of the hugh conglomerate that Wal-Mart is.

I believe that Wal-Mart would take our money and use it in other places and when the common person needs the money it would not be there for them. I also belive that a bank owned by the largest corporation in the world(I think) would really create a dangerous world. If for any reason Wal-Mart should go under it might even create another crash on our economy. At this time I believe that the FDIC should turn down this part and let Wal-Mart stay as the store it is.
